## Application

Laptop, desktop and server applications
High current power supplies
Battery powered devices
PMIC

## Features

RoHS compliant \& halogen free
Low resistance and high current rating
Magnetic core made by high performance magnetic metal powder AEC-Q200 grade 1 qualified

## Product Identification

Test frequency: $100 \mathrm{KHz}, 0.25 \mathrm{~V}$.
Test instruments: Inductance/saturation current: Keysight 4285A or equivalent.
Rdc: ADEX AX1152D or equivalent.

## Notes:

1. The heat rating current (Idc) will cause temperature rise approximate $40^{\circ} \mathrm{C}$.
2. The saturation current (lsat) will cause initial inductance drop approximate $30 \%$.
3. All test data is referenced at $25^{\circ} \mathrm{C}$ ambient.
4. Operating temperature range $-55^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$.
5. The part temperature (ambient + temp rise) should not exceed $125^{\circ} \mathrm{C}$ under the worst condition.
6. The temperature of component is affected by application conditions, e.g. circuit design, copper thickness of PCB and cooling conditions, the actual component temperature should be tested in the end application.

## Safety precaution

1. Do not make any through holes and copper pattern in the dotted line area. Except a copper pattern to the electrode.
2. Don't design/mount any components in contact with this product.

This power choke do not have any protective function in abnormal condition such as overload, short circuit, open conditions and etc, it shall be confirmed as the end product that there is no risk of smoking, fire, dielectric withstand voltage, insulation resistance etc. in abnormal conditions to provide protective devices and/or protection circuit in the end product.It is recommended the temperature rise of choke during operation is less than $50^{\circ} \mathrm{C}$.

## - Packaging

## Peel-off force

THICKNESS (t) $0.10(0.004) \mathrm{MAX}$.

The peel off force of cover tape is 10 to 70 grams in the arrow direction.
